4. FIRST AID MEASURES

First Aid Procedures

Inhalation Move victim to fresh air.

Skin ContactTake off contaminated clothing, shoes and leather goods (e.g. watchbands, belts). Quickly and

gently blot or brush away excess chemical. Immediately flush with lukewarm, gently flowing water for at least 30 minutes. Thoroughly clean clothing, shoes and leather goods before reuse

or dispose of safely. If irritation or pain persists, see a doctor.

Eye Contact Quickly and gently blot or brush chemical off the face. Immediately flush the contaminated

eye(s) with lukewarm, gently flowing water for at least 30 minutes, while holding the eyelid(s) open. Take care not to rinse contaminated water into the unaffected eye or onto the face. If

irritation or pain persists, see a doctor.

Ingestion Have victim rinse mouth with water. NEVER give anything by mouth if victim is rapidly losing

consciousness, or is unconscious or convulsing. DO NOT INDUCE VOMITING. Give plenty of

water to drink Call a Poison Centre or doctor if the victim feels unwell.

5. FIRE FIGHTING MEASURES

Flammable Properties Does not burn.

Suitable Extinguishing Media Not combustible. Use extinguishing agent suitable for surrounding fire.

Unsuitable Extinguishing Media None known

Specific Hazards Arising from

the Chemical

In a fire, the following hazardous materials may be generated: carbon monoxide & carbon

dioxide.

Protective Equipment and

Precautions for Firefighters

Review Section 6 (Accidental Release Measures) for important information on responding to

leaks/spills.

6. ACCIDENTAL RELEASE MEASURES

Personal PrecautionsUse the Personal Protective Equipment recommended in Section 8 of this MSDS. Slippery after

spillage or leakage.

Environmental Precautions It is good practice to prevent releases into the environment. Do not discharge into drains

undiluted.

Methods for Containment and

Clean-up

Small spills or leaks: contain and soak up spill with absorbent that does not react with spilled product. Contaminated absorbent poses the same hazard as the spilled product. Large spills or leaks: remove or recover liquid using pumps or vacuum equipment. Flush spill area. Dike and

recover contaminated water for appropriate disposal. Review Section 13 (Disposal

Considerations) of this MSDS.

7. HANDLING AND STORAGE

HandlingOnly use where there is adequate ventilation. Prevent accidental contact with incompatible

chemicals. Keep containers tightly closed when not in use or empty. Wear personal protective

equipment to avoid direct contact with this chemical.

Storage Store in an area that is: cool, dry well-ventilated, separate from incompatible materials (see

Section 10: Stability and Reactivity). Store in the original, labelled, shipping container. Protect

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering ControlsMechanical ventilation is recommended for all indoor situations. Well designed and well-

maintained ventilation systems remove vapours, fumes, mists from the workplace. If ventilation is insufficient, wear breathing appartus protection. Provide eyewash and safety shower if

contact or splash hazard exists.

Personal Protective Equipment (PPE)

Eye/Face Protection Wear chemical safety goggles or face shield when contact is possible.

Skin Protection Avoid repeated or prolonged skin contact. Wear chemical protective clothing e.g. gloves,

aprons, boots. Suitable materials are: Natural latex, 1,0 mm thick, permeation time: max 480

min. or chloroprene 0.8 mm thick, permeation time: max.480 min.

Respiratory Protection Not normally required if product is used as directed. Do not breathe in this product. Wear

respiratory protection if ventilation is inadequate.

General Hygiene Considerations Wash hands before break and after work. Keep away from food and drink. Remove

contaminated clothing. Do not breathe vapours. Avoid contact with eyes and skin.
